

# 10 TIPS

## TO ENJOY THE SUMMER SAFELY

### Get vaccinated

The more people are vaccinated, the safer we will be.

### Wash your hands regularly

And follow the other hygiene rules, for example, when you cough or sneeze.

### Not feeling well? Got symptoms?

Stay at home and contact your doctor.

### Get tested

If you have not been vaccinated yet, self-tests are available in pharmacies.

### Stay outside as much as possible

It's safer outdoors.

### Small groups

Five people meeting is safer than fifty.

### Have all the people in your group been vaccinated?

If so, you don't need to wear a face covering.

### Air your rooms

To avoid the formation of a viral cloud inside.

### Keep your distance

Keep a distance of 1.5 metres until everyone has been vaccinated. It's safer.

### Even when travelling, stay safe

Download the digital Covid certificate, the corona-app, and make sure you know the rules applicable to where you are.
